ⓘ More Info

# KEY FEATURES

- Simple: Creating a profile and logging in
- Medium: Adding friends, private messages and editing profile
- Complex: Creating groups and scheduling movie streaming with chat, live reactions...

# PAPER PROTOTYPE

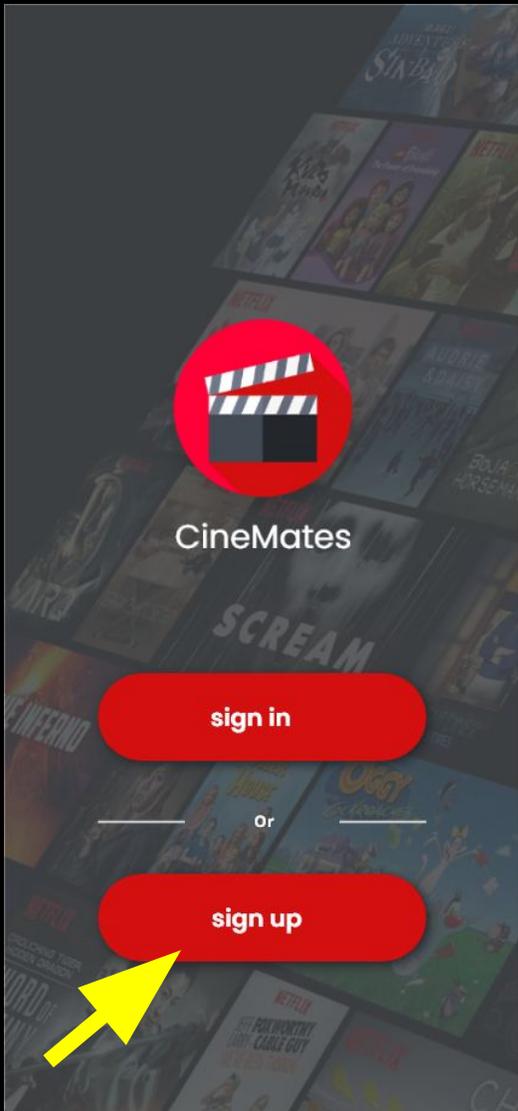

# TESTING PHASE

- Able to test only on 3 people (family members) due to Covid Restrictions
- Intuitive design because of familiar input fields and simple look
- Participants: Both genders included, age range: 20 - 50  
Different backgrounds, from little knowledge about technology to someone working in the computer industry.

# TESTING PHASE: CHANGES

- Added a window of the actual screen sharing
- Incorrect password pop-up window
- Various user restrictions
- Adding friends using a QR code
- Movie Sharing example added

# TASK FLOWS : COMPLEX PT.2

# PROTOTYPE OVERVIEW : LIMITATIONS/TRADEOFFS

- The paper prototype was for a web browser but the actual prototype was designed as a mobile application
- The Movie/TV show can be chosen just from an already given list
- Voice chat during movie was added in the prototype

# PROTOTYPE OVERVIEW : WIZARD OF OZ TECHNIQUES

- We had to move pop up windows displaying errors or notifications
- When messages were sent, we had to “display” them on the screen
- Every new window was manually displayed
- Examples of groups, chat and messages were already given

# PROTOTYPE OVERVIEW : HARD CODED FEATURES

- The names of the movies and TV shows
- The input that was used for the groups/friends
- Movies/Tv shows are chosen from a given list, which limits options
- Previous data about groups, chats existed without a user adding it

Thank you
