Value Proposition and Story overview

Fake news has a long history, but today, the potential scale of impact actions is crucially affected by new digital platforms with a huge number of users.

In our story we let the user choose between 3 options which each option leads to the end of a different story. In doing so, we show the user how much the personal choice affects the unfolding of the story and can even lead to an happy or even critical end.

Sketches

« Samuel Paty » does a lecture about religion showing a naked caricature of Muhammad

He talks about freedom of speech and its limit

POV: Biased

I am an atheist

I am a muslim

Fake News B

Fake News A

I am shocked because he showed porn

He said that islam is a bad religion in an offensive way

Share on twitter / social networks

Share on twitter / social networks

It gets viral

Different comments. Porn showed to kids

Different comments. People threatening him of death → create fake tweets

POV: Manager

POV: Student

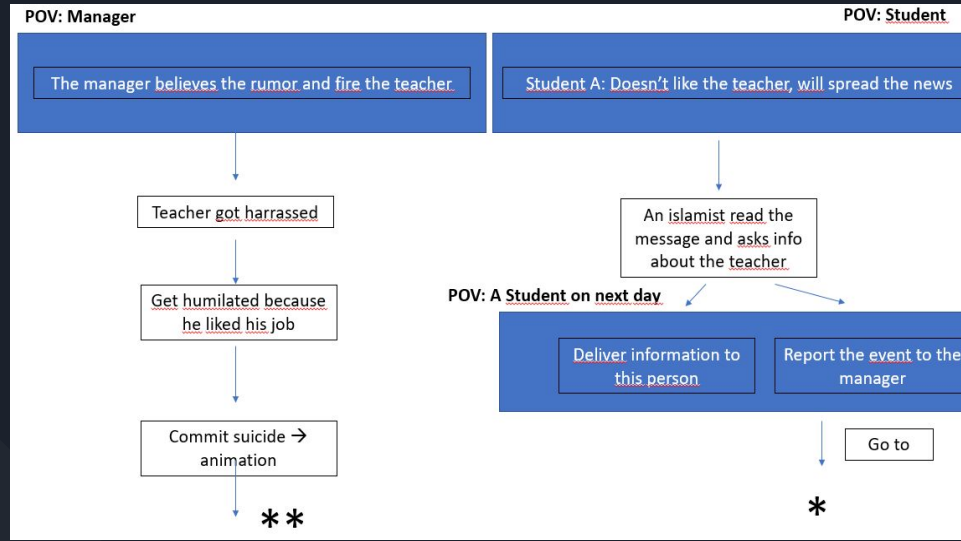

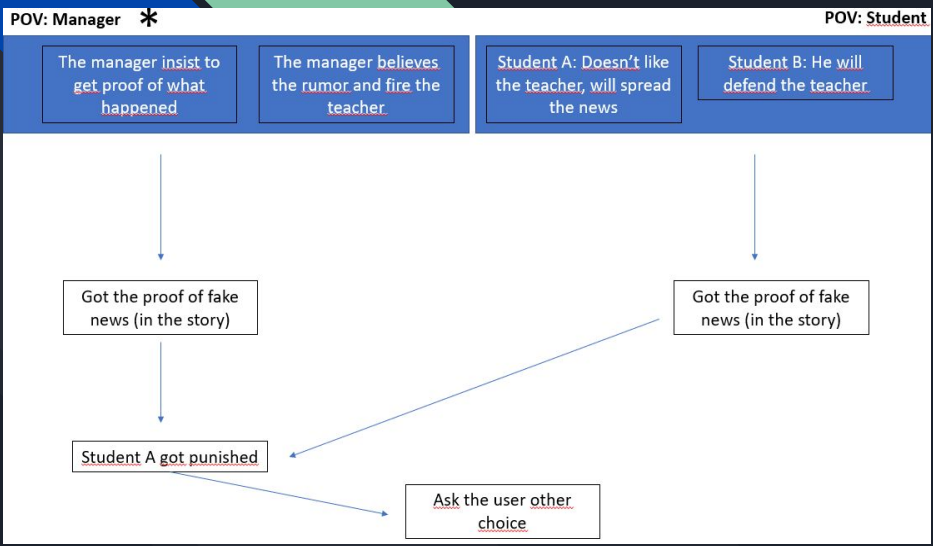

The manager insist to get proof of what happen.

The manager believes the rumor and fire the teacher.

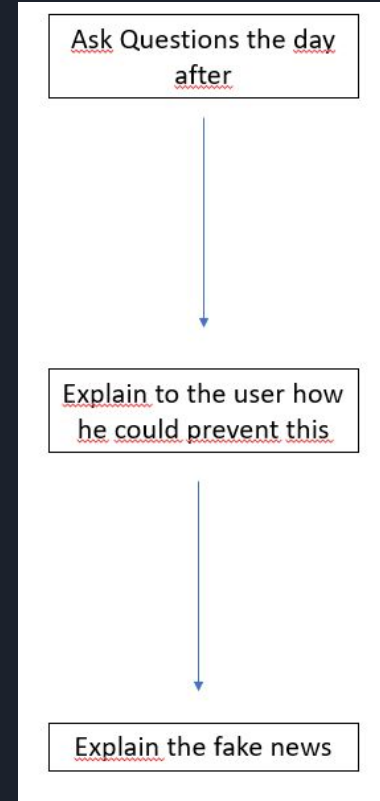

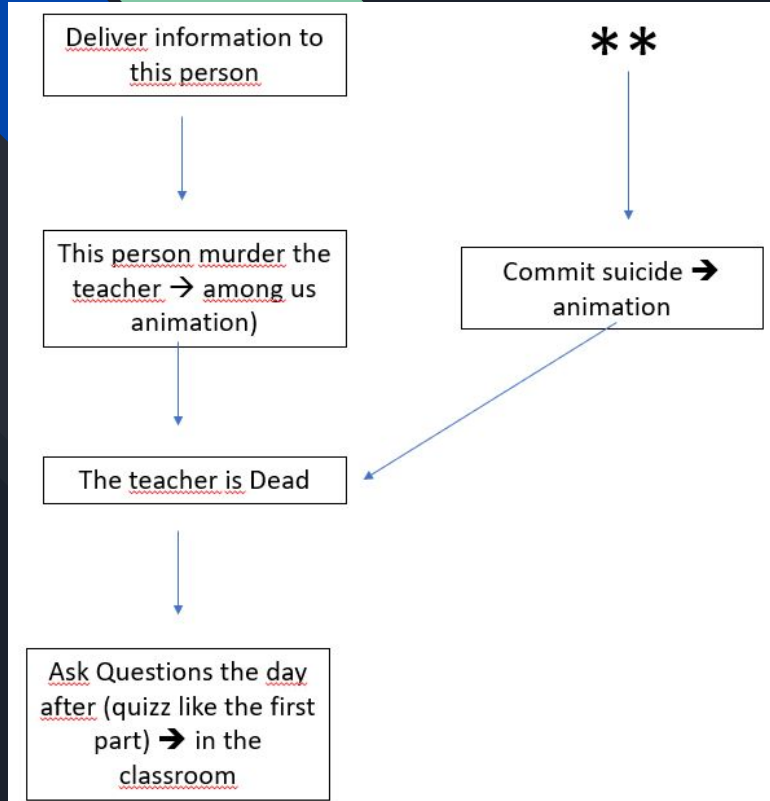

Student A: Doesn't like the teacher, will spread the news

Student B: He will defend the teacher.

Paper Prototype Testing

Game Procedure

- We told to the participants that this application is about preventing fake news.
- We let the participants play because it's a kind of story game.
- We asked what they think about it. Do they like the interface ? The concept ? Do they think they understand what is fake news and how to recognize it ?

Methology

- Target audience: Children and teens aged 11-25.
- Reason: a close-knit social setting that is greatly influenced by social networks and the spread of false rumors and news.

Participants :

- 1. Student, 25 years old
- 2. Student, 19 years old
- 3. Student, 20 years old
- 4. Teenager in high school, 16 years old
- 5. Teenager high school, 17 years old
- 6. Teenager in middle school, 13 years old

Paper Prototype Testing

Feedback

- + Good interfaces and good ideas :
 - the questionnaire is good because we feel that we are part of the story. (students 1, 2)
 - the idea that the story is in the first person, instead of a student or a teacher, is good we feel that we are in the story. (students 1, 2, 3)
 - Animations are good because it makes the story more realistic. (student 2, teenager 5)
 - The explanation in the last screen: why this was fake news ? is interesting. (student 2)
- - Sometimes hard to understand and some details to change :
 - mostly for the teenager, it was hard to understand and follow the story because it requires a minimum of culture. (teenagers 4, 6 student 2)
 - for the dialogue, they would like a skip button. (All)
 - The teacher in the beginning is strange for some and funny for others. (students 1,2 teenagers 5,6)

Paper Prototype Testing

What Did We Learn ?

- Put a button skip (we just increase the speed of the dialog)
- Put more animations for a better understanding
- People liked the idea of playing to a story game to learn something (like preventing fake news)

Mid-fi prototype overview - Limitations

1. Interface Limitation : use buttons instead of swiping right or left to communicate with the game.
2. No animation for 3D models.
3. "Hard coded"- automatic text display, no option to go backwards.
4. "Hard coded"- no embedded data.

Thank you for listening
